HIGHLIGHTS OF 2021
UN WOMEN IN TURKEY
2021 was an exceptional year of continued challenges, particularly those due to the COVID-19 pandemic, which exacerbated inequalities and disproportionately affected women and girls all around the world. It was also a remarkable year, with the Generation Equality Forum accelerating progress in achieving gender equality across the region.

In Turkey, UN Women made major strides in delivering on its mandate in the areas of increasing women’s participation and leadership in political and economic decision-making; advancing gender-responsive governance; preventing and combating different forms of violence against women and girls; advancing gender-sensitive refugee responses; transforming harmful norms and values; and engaging youth, men and boys in achieving gender equality. UN Women also reinforced its partnership and engagement with civil society, public institutions and the private sector through new programmes. In doing so, and in line with the ‘leaving no one behind’ principle, UN Women ensured that all programmes and projects took into account the COVID-19 pandemic’s disparate negative impacts on women and girls.
**GENDER RESPONSIVE PLANNING AND BUDGETING**

UN Women started the three-year, EU-funded project ‘Implementing Gender-responsive Planning and Budgeting in Turkey’. The project’s main beneficiary is the Ministry of Family and Social Services – General Directorate on the Status of Women; the co-beneficiary is the Presidency of Turkey – Presidency of Strategy and Budget. With a €3,300,000 budget, the project increases financing for gender equality and women’s empowerment through strategic partnerships, provides tailored technical assistance and guidance, and builds institutional capacity and knowledge at the central and local levels on gender responsive budgeting. **The Implementing Gender-responsive Planning and Budgeting in Turkey Project is included in the 2022 Annual Work Programme of the Presidency of the Republic of Turkey. It was also stressed in the negotiations of the 2022 Central Government Budget Law Proposal in the Planning and Budgeting Commission.**

**The ‘Budget Preparation Guideline 2022-2024’, published in 2021 by the Presidency of Strategy and Budget, strongly emphasizes gender-responsive budgeting. The Guideline will be used by all public institutions in the preparation of their budgets. The Gender-responsive Planning and Budgeting in Turkey project now has a vital role to expedite public institutions’ utilization of the Guidelines.**
